Revised October 2011

V08-3

Skill Sheet Packet Instruction

Purpose of the Skill Sheets

All skills listed in this packet are consistent with the 2008 edition of the NFPA 1001 Standard for Firefighter Professional Qualifications. The Alaska Fire Standards Council (AFSC) provides these skill sheets as the basis for Firefighter II testing and certification. For certification purposes, the final skill examination will consist of a series of mandatory skill stations and a selection of random skills from this packet. Before eligibility to test for Firefighter II, a candidate must have certification as a Firefighter I in Alaska.

Description & Use

1. These skills sheets are designed for use by the Training Officer and Firefighter II candidate. Use of this packet throughout a training program will assist in verifying candidate competency and completion of the [Firefighter II Training Record](#). For eligibility to complete the final certification examination, a candidate must demonstrate competency in all skills during training and satisfactorily complete all items on the Firefighter II Training Record document.
2. This packet is designed to encompass the requisite skills for Firefighter II and many of these skill sheets are used for final testing and certification. Accreditation Managers/Training Officers and Firefighter II course instructors should utilize this evaluation packet during a course to prepare candidates for the certification exam. These skills sheets should be given to every Firefighter II candidate at the beginning of a training course and used throughout the course for ongoing evaluation by the instructor. For a candidate's final skills evaluation, she or he must successfully perform each selected skill while being evaluated on performance competency by an AFSC examination representative.
3. The final skills examination will consist of skills selected from this packet. Skills are selected from the mandatory and random skills categories. This packet contains a list of all mandatory and randomly selected skills that are used for the final examination.
4. Random skill stations will be selected using a test management system within the AFSC office. The random skill stations are selected just prior to the test date. The Certifying Officer will notify candidates which skills they will be required to complete at the start of the practical skills portion on the date of the examination.
5. The completion of the Firefighter II Training Record establishes a candidate's eligibility to test. This document must be fully completed and signed by the Accreditation Manager/Training Officer or designee for each candidate before a candidate can begin the final skills examination. The Firefighter II Training Record and the practical skills evaluation sheets shall become a permanent part of the candidate's local training record, and this information shall be kept on file in accordance with local fire department procedures.

Grading Criteria

1. It is expected that all of the listed skill sheet elements will be taught and evaluated by the Firefighter II instructor throughout a course. During the final skills exam the candidate must be prepared to perform all the skills listed in this packet. There are no specific critical points designated within the practical skill sheets, and the Certifying Officer (CO) will require the candidate to repeat an individual practical skill station if *all* of the listed skill items on a selected sheet are not completed by the candidate.
2. This packet contains skill requirements that involve the demonstration of firefighting skills within "simulated" fire scenarios related to fire ground activities. When applicable, skill sheets specifically describe when simulated fire conditions are permitted for certification testing.

AFSC FIREFIGHTER II PRACTICAL SKILLS EVALUATION PACKET

3. Regardless of which final examination skills are selected, there are critical performance items that must be followed for satisfactory performance. Examples of unsatisfactory performance can include:
- a. Exceeding limitations: time, safety, and equipment limitations
 - b. Inadequate/insufficient personal protective equipment
 - c. Lack of skill accuracy and task completion as defined on the skill evaluation sheet
 - d. Poor judgment in skill performance (i.e.- wrong application of tool or equipment or safety violation)
 - e. Failure to appropriately apply basic fire fighting knowledge
 - f. Not competent in the specified task or skill steps
 - g. Outcome of the specified task is in doubt (i.e.- incorrectly performed or did not accomplish skill evaluation criteria)
 - h. Need for Evaluator intervention (i.e.- imminent health or safety risk to candidate or others)
 - i. Failure to adhere to basic safety principles or guidelines

Artificialities of Training and Testing

Training and testing for Firefighter II can only approximate the "real world" activities of a firefighter. There are certain artificialities to training and testing that the candidate must be able to adapt to, and simulations during the final examination are often necessary to complete the required practical skill scenarios. Candidates must be aware that "real world" situations cannot be completely duplicated during final examination scenarios. For the best possible outcome during final skills examination, Firefighter II instructors must prepare the candidates to competently perform the skills listed in this packet throughout a training course.

Final Skills Evaluation

The AFSC designated Certifying Officer (CO) conducts the final evaluation and utilizes the practical skills evaluation sheets during the final examination process. Throughout the final examination, the CO has the overall test site authority and is required to perform his or her duties as outlined in the [Certification Policy Manual](#).

For preparation of the final examination the designated CO must coordinate with the Accreditation Manager/Training Officer, or designee, to ensure an adequate test site location is available. The Accreditation Manager/Training Officer is responsible for preparation of all test site equipment/materials and arranging designated evaluators for the date of the practical examination. The CO must verify that all required elements are adequate for testing and will approve all designated Evaluators. Designated Evaluators shall receive training appropriate for the test site and are required to complete an [Evaluator Code of Ethics Compliance](#) agreement before testing begins.

The CO shall verify completion of the final examination packet, and the packet will be attached to the Firefighter II Training Record as part of the candidate's permanent local training record.

Emergency Medical Care and Hazardous Materials Operations Requirements

Emergency Medical Care requirements (NFPA 1001, 4.3) and Hazardous Materials requirements (NFPA 1001, 5.1) are included with recent Firefighter I certification. However, candidates with Firefighter I certs issued prior to June of 2010 must complete Hazardous Materials Operations as indicated on the Firefighter II Training Record. Candidates that have already completed Hazardous Materials Operations certification have no additional hazardous materials practical requirement to test for Firefighter II.

For candidates that obtained Firefighter I certification prior to June of 2010, Hazardous Materials requirements shall follow the guidelines listed in the [Hazardous Materials Certification](#) Directive. The final skill evaluation shall be conducted using the [Hazardous Materials Operations Skill Sheets](#). For candidates without Hazardous Materials Operations certification, the final practical examinations skills for the Hazardous Materials Operations portion shall be included with the Firefighter II practical skills evaluations.

AFSC FIREFIGHTER II PRACTICAL SKILLS EVALUATION PACKET

Additional Notes:

1. During the final practical examination it is expected that an appropriate uniform, or full personal protective equipment (PPE), shall be worn unless otherwise indicated within the skill evaluation sheet.
2. During some scenarios a candidate may be instructed to perform other Firefighter I/II tasks not directly related to the specific skill sheet evaluation being tested. It is expected that the candidate shall perform all related skills correctly.
3. Some skills may include a time limit. An Evaluator may use a digital or analog watch/stopwatch for final skills evaluation. Prior to the start of the practical examination, the CO must inspect and approve all timing devices used during final skills evaluations.
4. Some skills require that equipment or documentation be used within the final skills examination. Unless otherwise indicated, it is permissible for the candidate to prepare or assemble the required equipment or paperwork at any time, provided that this does not interfere with the core skill, task, or evolution.
5. Candidates must be prepared to complete skills under a variety of conditions. Training and skills practice is often done during optimum conditions, but candidates must be prepared to adapt to changing conditions that can occur in actual fire ground situations. The Evaluator ultimately determines if the candidate has met the criteria specified on the skill(s) being evaluated.
6. For final examination, the performance of a skill, task, or evolution is not required to be done in the exact order of the steps (as outlined on the skill sheet), unless it is critical to a particular task. For example, a person must don turnout gear before donning an SCBA.
7. Some scenarios may involve skills that must be performed as a team. During final skills examinations Evaluators and candidates must be cognizant that each team member is evaluated separately to ensure individual criteria is met. An individual candidate may be required to repeat a task if they do not satisfy the skill sheet requirements if working as a member of a team.
8. Some skills may require that a candidate verbalizes information about a particular task or procedure. In such cases, any question(s) from the Evaluator to the candidate must be limited to those that satisfy the criteria listed on the skill sheet, and a question cannot exceed the scope the Firefighter II requirements.

Firefighter II Final Written and Practical Examinations

Following is a brief outline of the reference materials and documents that are used for a Firefighter II final examination:

Firefighter II Written Material References

- a. NFPA 1001 Standard for Professional Firefighter Qualifications, 2008 edition
- b. Text (any one of the following)
 - IFSTA, *Essentials of Firefighting and Fire Department Operations* 5th Edition
 - Jones and Bartlett, *Fundamentals of Fire Fighter Skills*, 2nd Edition
 - Delmar, *Firefighter's Handbook*, 3rd Edition

Firefighter II Practical Skills Evaluation References

- a. NFPA 1001 Standard for Professional Firefighter Qualifications, 2008 edition, Chapter 6
- b. Firefighter II Practical Skills Evaluation Sheets (*this packet*)

Final Examination Steps

- a. *[Firefighter II Training Record](#) review (*this must be completed and signed off by the Accreditation Manager/Training Officer or designee prior to the date of the final examination and reviewed by the CO to ensure all elements are complete.*)
- b. Certifying Officer reviews and signs candidate Application for Certification

AFSC FIREFIGHTER II PRACTICAL SKILLS EVALUATION PACKET

- c. Candidate completes the written examination administered by the CO
- d. Candidate completes the practical examination administered by the CO.
- e. Certifying Officer reviews completed Evaluator skill sheets and transfers information to the [Practical Examination Reporting Form](#) (PERF)
- f. Written exam, PERF, and signed application are forwarded to AFSC.
- g. AFSC Firefighter I certificate is issued upon successful completion of the written and practical exam
(*within approximately 30 days of test date*)

**Note: The candidate's completed Training Record and signed Final Examination skill sheets shall be kept on file in accordance with local fire department procedures.*

NFPA 1001- 2008 Ed.

PRACTICAL SKILL REQUIREMENTS

FFII- 6.3.1

Candidate:	Date:
-------------------	--------------

STANDARD: NFPA 1001: 6.3.1	SKILL AREA: Foam Operations
TASK: Extinguish an ignitable liquid fire, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is created, a foam blanket is applied and maintained on the surface of the fuel, the fire is extinguished, re-ignition is prevented, team protection is maintained, and the hazard is faced until retreat to safe haven is reached.	
PERFORMANCE OUTCOME: The candidate shall be able to prepare a foam concentrate for use, assemble foam fire stream components, for a given ignitable liquid fuel and conditions.	
EQUIPMENT: Personal protective equipment, SCBA (CO to determine if on air), pump apparatus, attack line, foam proportioner/educator, foam compatible nozzle, foam concentrate (<i>or simulated foam product</i>), and water supply.	
CONDITIONS: Given a fire scenario*, the candidate shall demonstrate the ability to: *this demonstration may be a simulation of a burning liquid, or liquid that has not yet been ignited	

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Select the appropriate foam concentrate and prepare foam concentrate for the given fuel and conditions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Set up apparatus and assemble foam stream components	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	Charge hoseline and safely approach the fire or fuel as a team	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Certifying Officer shall select one of the following tasks for final certification examination:							
	a. <input type="checkbox"/> Roll-On Method: Use method to apply a foam blanket						
	b. <input type="checkbox"/> Bank-Down Method: Use method to apply a foam blanket						
	c. <input type="checkbox"/> Rain-Down Method: Use method to apply a foam blanket						
4.	Apply properly proportioned foam to the surface of the fuel and create and maintain a foam blanket	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.	Extinguish the fire and prevent re-ignition	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Maintain team protection with a foam stream	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Face the hazard until the team has completely retreated to a safe haven	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

FFII- 6.3.2a

Candidate:	Date:
-------------------	--------------

STANDARD: NFPA 1001: 6.3.2	SKILL AREA: Fire Attack
-----------------------------------	--------------------------------

TASK: Coordinate an interior attack line for an interior structure fire, so that crew integrity is established; attack techniques are selected for the given level of the fire (e.g., attic, grade level, upper levels, or basement); attack techniques are communicated to the attack teams; constant team coordination is maintained; fire growth and development is continuously evaluated; search, rescue, and ventilation requirements are communicated or managed; hazards are reported to the attack teams; and incident command is apprised of changing conditions.

PERFORMANCE OUTCOME: The candidate shall demonstrate the ability to assemble a team, choose attack techniques for various levels of a fire, evaluate and forecast a fire's growth and development, select tools for forcible entry, incorporate search and rescue procedures and ventilation procedures in the completion of the attack team efforts, and determine developing hazardous building or fire conditions.

EQUIPMENT: Personal protective equipment, SCBA (on air), hand tools, attack line, pump apparatus, portable radio, ground ladders, ventilation equipment.

CONDITIONS: Given a grade level simulated fire scenario, attack lines, personnel, and tools, the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
	Certifying Officer shall select one the following interior fire attack scenario for final certification examination:						
	a. <input type="checkbox"/> Below grade fire (<i>basement/cellar</i>) b. <input type="checkbox"/> Grade level fire c. <input type="checkbox"/> Above grade level fire (<i>second story or above</i>) d. <input type="checkbox"/> Attic fire						
1.	Assemble a team for fire attack	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Conduct a size up and communicate an action plan to team	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	Select appropriate tools and equipment for forcible entry	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.	Evaluate fire conditions upon entry and forecast anticipated fire spread and development	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.	Request coordinated ventilation based on fire conditions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Request search and rescue activities based on fire conditions and given information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Determine any developing and/or potential hazardous building or fire conditions and communicate to incident commander	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8.	Correctly extinguish fire using appropriate pattern based on fire conditions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.	Maintain the personal safety of all team members	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

PRACTICAL SKILL REQUIREMENTS

FFII- 6.3.3a

Candidate:	Date:
-------------------	--------------

STANDARD: NFPA 1001: 6.3.3	SKILL AREA: Gas Cylinder Fire
TASK: Control a flammable gas cylinder fire, so that crew integrity is maintained, contents are identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless the leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and the cylinder is faced during approach and retreat.	
PERFORMANCE OUTCOME: The candidate shall be able to control a flammable gas cylinder fire by advancing a hose line to a point where control valves can be operated.	
EQUIPMENT: Personal protective equipment, SCBA (on air), attack line, pump apparatus, water supply, portable radios, gas cylinder training prop with valve.	
CONDITIONS: Given a simulated flammable gas cylinder fire scenario, an attack line, and tools, the candidate shall demonstrate the ability to:	

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Identify container contents and safe havens prior to advancing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Advance toward the fire so that a smooth, controlled, and safe approach is made and team integrity maintained	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	As directed, operate the nozzle and adjust patterns for the following techniques: <input type="checkbox"/> Straight stream for reach and initial cooling. <input type="checkbox"/> Narrow fog stream to cool the cylinder <input type="checkbox"/> Wide fog stream to shield personnel from flames and to push flames away from control valves	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.	Cite the common indicators used for assessing cylinder integrity and monitoring for changing conditions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.	Select appropriate procedures for when changes in conditions occur	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Advance and position fire streams in a manner that provides safe access for personnel to operate control valves	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Apply the fire stream without extinguishing the flames unless leaking gas has been stopped	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8.	Operate control valves so that gas flow is stopped	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9.	While facing the hazard, retreat in a smooth and controlled manner until the entire team reaches a safe haven	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Instruction Sheet for Evaluation Sheet FFII AK Life Safety Presentation Supplement

The Alaska Fire Standards Council considers fire and life safety education components to be a critical skill for firefighter personnel. This requirement is specified in NFPA 1001 2008 chapter 6, and must be completed as part of the requirement for Firefighter II certification.

Alaska Firefighter II certification testing for this skill is not required *if* this skill was completed during a Firefighter I certification test within three years of the Firefighter II test date.

Complete the job performance skill as detailed below:

Present a prepared program to an identified audience, given a lesson plan, time allotment, and instructional materials. Please reference the Alaska fire statistics information online (<http://www.dps.alaska.gov/Fire/TEB/alaskafirestatistics.aspx>) to assist in identifying a target topic for your community. Suggested topics include:

- | | |
|---|--|
| a. Cooking Safety | f. Heating Safety |
| b. Stop, drop and roll | g. Crawl low in smoke |
| c. Escape planning | h. Alerting others in emergencies |
| d. Calling the fire department | i. Other fire prevention lesson |
| e. Smoke alarm placement, testing, and maintenance | |

DIRECTIONS: The objective for this skill is for the firefighter to present a basic fire life safety education class using prepared material. The intended audience is the general public and community members, and this lesson may be taught to a wide variety of audiences. Possible audiences could include: school children, adults, church groups, public service groups or other members of the general public, day care centers, or nursing homes.

Lesson plans for this presentation can be found in the NFPA Learn Not To Burn Curriculum and the Kids Safe Fire Safety Program. Many individual fire department fire prevention programs also have lesson plans that can be used.

After teaching this lesson, FFII practical skill sheet 6.5.2 must be completed for receive credit for the activity.

The completed skill sheet, signed by the Lead Instructor or Chief Officer, will document the necessary information for a candidate to receive credit for the activity.

AFSC FIREFIGHTER II PRACTICAL SKILLS EVALUATION PACKET

NFPA 1001- 2008 Ed.

PRACTICAL SKILL REQUIREMENTS

FFII- 6.5.3

Candidate:	Date:
-------------------	--------------

STANDARD: NFPA 1001: 6.5.3	SKILL AREA: Pre-Incident Survey
TASK: Prepare a pre-incident survey, so that all required occupancy information is recorded, items of concern are noted, and accurate sketches or diagrams are prepared.	
PERFORMANCE OUTCOME: The candidate shall demonstrate the ability to identify the components of fire suppression and detection systems; sketch the site, buildings, and special features; detect hazards and special considerations to include in the pre-incident sketch; and complete all departmental forms.	
EQUIPMENT: Department field survey forms/QAP template, pre-incident plan SOG/SOP, pencil/pen, clipboard, and appropriate attire.	
CONDITIONS: Given a building with a fire detection and suppression system, the candidate shall demonstrate the ability to:	

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Appropriately notify the building occupant and arrange to complete the field survey	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Identify the components of fire suppression and detection systems to include in the survey	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	Sketch the site, buildings, and applicable special features	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.	Detect applicable hazards to include in the pre-incident drawings	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.	Detect applicable special considerations to include in the pre-incident diagrams	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Complete all related departmental forms and final diagrams	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Route, file, and/or forward report in accordance with local agency requirements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

NFPA 1001- 2008 Ed.

PRACTICAL SKILL REQUIREMENTS

FFII- 6.5.5

Candidate:	Date:
-------------------	--------------

STANDARD: NFPA 1001: 6.5.5	SKILL AREA: Hose Service Test
-----------------------------------	--------------------------------------

TASK: Perform an annual service test on fire hose, so that procedures are followed, the condition of the hose is evaluated, any damaged hose is removed from service, and the results are recorded.

PERFORMANCE OUTCOME: The candidate shall demonstrate the ability to operate hose testing equipment and nozzles and to record results.

EQUIPMENT: Personal protective equipment, fire hose, hose testing pump, pressure gauge, timing device, NFPA 1062, hose tools, marking device, and hose maintenance record.

CONDITIONS: Given a fire station bay or large area for testing hose, the candidate shall demonstrate the ability to:

No.	TASK STEPS	TEST		RETEST 1		RETEST 2	
		P	F	P	F	P	F
1.	Mark hose directly behind coupling, inspect gasket condition, and visually inspect hose for damage	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2.	Assemble hose lines to a maximum length of 300 feet and connect to a discharge port with a restricted flow	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	Fill hose with water and bleed air from all lines,	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3.	Check couplings for leaks and tighten couplings as needed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4.	Operate hose-testing equipment so that all hose lines are pressurized in accordance with NFPA 1962	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5.	Maintain test pressure for five (5) minutes and watch for leaks or weeping	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6.	Reduce hose pressure, bleed lines, and inspect each hose for any slipped couplings	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7.	Complete all applicable recording and reporting procedures, according to local policy and procedure	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8.	Report any damaged or out-of-service hose in accordance with local policy and procedure	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

6.5.4	Maintain power plants, power tools, and lighting equipment	Random	<i>NFPA changed section reference; Minor</i>	11
6.5.5	Perform an annual service test on fire hose	Random	<i>NFPA changed section reference; Minor</i>	12

***6.5.2 is evaluated locally and the practical skill check-off is completed by the Lead Instructor or a Chief Officer prior to the certification examination date**

****Candidate is not required to repeat this skill if it was completed for the AFSC FFI certification test within 3 years of FFII test date**

AFSC FIREFIGHTER II PRACTICAL SKILLS EVALUATION PACKET

NFPA 1001 2008 Edition Changes to Skill Sheets

- Reformatted sheet numbering for consistency with NFPA sections:
 - Numbers indicate chapter section (i.e. all FFI is chapter 6, and sub categories follow number format). Skill sheet number represents NFPA section
 - Lower case letter indicates multiple pages for single category (i.e. section 6.3.2 lists too many skills for a single skill set to fit on a single page; pages are listed as 6.3.2a and 6.3.2b)
- Added third Pass/Fail Column for consistency with certification directive
- Simplified the “Overall Skill Sheet Score” to one box; eliminated the retest box

Specific Skill Sheet Changes from 2002 to 2008 Editions:

- 6.3.1 Combined skill requirements to include all elements and clarified test guidelines
- 6.3.2 Combined skill requirements to include all elements and clarified test guidelines
- 6.5.1 Added due to NFPA change from FFI to FFII skill
- 6.5.2 Added due to NFPA change from FFI to FFII skill: *Not required to be duplicated if completed at the FFI level within three years of FFII test date*
